

There is too much media consolidation. It is downright frightening when one group can control large chunks of the media and use their power to make political statements. There is a responsibility to use this power for the benefit of the public at large, not for a clearly political agenda. I am appalled to hear that Sinclair Broadcasting are planning to cancel regular shows to plug for Bush. We need to return control of all media to local communities and get corporations entirely out of the media. It is a serious threat to our democracy. It is your responsibility to keep this part of democracy functioning.

Please insist that Sinclair Broadcasting either stop using the public airwaves immediately or balance their anti-Kerry documentary with a pro-Kerry documentary, such as Going Up River.

Thank you for taking this urgent matter seriously and acting NOW.
